**Patience, The key to paradise**

*“Patience is a practice in trust.”*

All of us dream. Dream of huge things. Fantasize events, people, places, things and what not but it is a rare gift to be able to live the life of our dreams. Being successful does not depend on one sole factor. It is an amalgamation of various virtues that lead one to the life of their dreams. Hard work, patience and self-trust are few of the many things one needs to fulfill their dreams. The problem with today's generation is the lack of Patience and self-doubt. It is in our mindsets to dodge paths if our destination takes time, to dodge roads that are full of boulders and to dodge roads that are way out of our comfort zones but to be true, difficult roads lead to beautiful destinations. Each drop of our sweat and each second of our practice matters. It is easy to give up but a herculean task to trust the process and go on. Marvelous things take time, but they are possible. People invest years in striving to be able to do what they always wanted. All the countless sacrifices, sleepless nights, scuffles, and downfalls pay off. In the end, the struggles, the harsh roads, and the tough times that you have been through make you the strong person you will be in the future. That is what beautifies the story of our success and gives it the worth it deserves. Time will go slipping off your hands but do not let your fire go out, spark by irreplaceable spark in the hopeless swamps of the not-quite, the not yet, and the not-at-all. The world you desire can be won. It exists, it is real, it is possible, it's yours. All you need is to give yourself some time!
